

Modernise Endpoint Management with Windows 365 and Intune

Deliver secure, flexible and AI-powered work experiences from virtually anywhere

Solution Area

Digital Workplace

Business Challenge

Hybrid work models, growing security demands, and increasing device complexity are forcing organisations to rethink traditional desktop management. IT teams need to provide users with secure access to applications and data while maintaining operational efficiency and controlling costs. Supporting remote employees, contractors, mergers and acquisitions, and rapidly changing workforce requirements often creates significant management challenges. Businesses need a modern endpoint strategy that balances productivity, security, and user experience.

Benefits

- Enable secure access from any location or device
- Simplify endpoint management and administration
- Improve employee productivity and flexibility
- Create a tailored roadmap for Windows 365 adoption

How We Help

Our **Windows 365 Endpoints Workshop** explores how Cloud PCs, **Microsoft Intune Suite**, and modern endpoint management can transform the employee experience. We help assess business requirements, identify use cases, define governance and security considerations, and create a practical adoption plan aligned to your organisation's objectives.

Microsoft Highlights

22 Specialisations including:

- Identity and Access Management
- Threat Protection

7 Partner Designations, including:

- Data & AI
- Security
