Modern endpoint management powered by the Microsoft Cloud

Microsoft Intune Suite Pilot

The world is driven by the evolving technology landscape and a workforce that perform their duties both in and out of the office…

80-90% of all successful ransomware compromises originate through unmanaged devices.[1]

10% of large organisations will have a comprehensive, mature, and measurable Zero Trust program in place by 2026, up from less than 1% today. Organisations need to prepare.[2]

By 2025, the consumerisation of AI-enabled fraud will fundamentally change enterprise attack surfaces.[3]

How are you improving security and cutting costs while delivering better experiences and better outcomes for the people in your organisation?

While advances in generative AI are transforming how we work, they are also reshaping how we protect our crucial data.

Harnessing the generative AI capabilities of Microsoft Copilot for Security, cloud-based Microsoft Intune Suite empowers organisations with cutting-edge capabilities to help enhance security, streamline management, and optimise productivity.

Assessment highlights

Provide secure helpdesk-to-user assistance with cloud-based Remote Help

Enable standard users to perform elevations approved by your organisation

Get a lightweight VPN solution for mobile devices that requires no device enrollment

AI and analytics-driven capabilities help IT admins understand, anticipate, and proactively improve end user experiences

Get easy app discovery, deployment, and updating using a securely hosted enterprise app catalog

Reduce the complexity of managing certificate infrastructure with cloud-based certificate lifecycle management

Why you should attend

Explore the advanced capabilities of Microsoft Intune Suite within your own environment.

This pilot engagement will show you how to pilot new capabilities to empower IT admins, improve user experiences, and help increase security.

By attending, you can:

Learn how the Intune Suite enables users to be productive and secure, on any device, without compromising IT security.

Discover how to unify your endpoint management solutions and workflows in one place, reducing complexity for IT and SecOps.

Secure your users' devices by utilising Microsoft Security signals and advanced capabilities to mitigate threats and protect corporate data.

Do more with less by consolidating vendors with Microsoft for efficient, cost-effective licensing. Improve end user productivity and performance across devices.

What to expect

Get an executive deep dive into Microsoft Intune Suite that empowers IT admins, improves user experiences, and helps to increase security. Our goal is to show you the advanced capabilities of Microsoft Intune Suite and to work together on piloting these capabilities in your own environment for selected users.
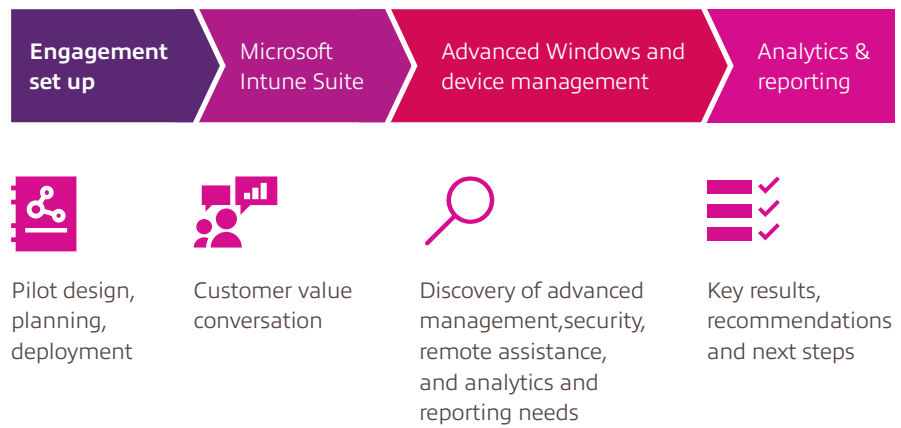

Who should attend

The workshop is intended for IT Management decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
- Security Architect
- Security Engineers

We'll work with you to:

- Learn how the Intune Suite enables users to be productive and secure, on any device, without compromising IT security.
- Unify your endpoint management solutions and workflows in one place, reducing complexity for IT and SecOps.
- Discover how to empower IT with easier and secure Windows and device management.
- Ensure device health and compliance by utilising Microsoft Security signals and advanced capabilities to mitigate threats and protect corporate data.

We'll customise the pilot based on your organisation's needs

Engagement set up	Microsoft Intune Suite	Advanced Windows and device management	Analytics & reporting
Pilot design, planning, deployment	Customer value conversation	Discovery of advanced management, security, remote assistance, and analytics and reporting needs	Key results, recommendations and next steps

Why Insight for Microsoft?

Few can compare with our relationship with Microsoft. Partners for 30 years and counting, we are the largest Microsoft global partner with more than 5,000 consultants and 1000 dedicated Microsoft resources globally. Our best-in-class capabilities, unmatched expertise, and ability to successfully deliver solutions built across all areas of Microsoft technology have earned us numerous recognitions.

7 **Microsoft Solutions Partner Designations,** including:
- Security
- Microsoft Cloud
- Infrastructure (Azure)

22 **Specialisation,** including:
- Identity and Access Management
- Threat Protection
- Azure Virtual Desktop

Microsoft Partner Awards, including:
- 2023 Microsoft Australia Partner of the Year
- 2023 Microsoft Hong Kong Partner of the Year
